

## TEKNIKUM® Rubber wheel chocks

### APPLICATIONS

Teknikum® Wheel chocks can be used under the wheels of different vehicles. The rubber wedges are flexible and act as efficient chocks for wheels, and due to their high friction coefficient, the wedges do not slip under the wheel. Wedges can be used as pairs by threading a rope through the wedges.

Wedges can be used, for example, under the wheels of an aircraft. We manufacture our wedges from an environmentally friendly recycled rubber material.

### ADVANTAGES

- Durable and wear resistant
- Provides great grip
- Improves safety
- Suitable for vehicles and aircrafts

### TECHNICAL PROPERTIES

#### Structure

- Black EPDM

#### Temperature range

- 40°C...+100°C

### ENVIRONMENTAL RESISTANCE

- Weather resistant

### MANUFACTURER

Teknikum Oy (Business ID FI07645274),  
Nokiankatu 1, 38210, Sastamala, Finland
