

SAFETY CLAMP

APPLICATIONS

Hose clamps according to EN 14420-3 (DIN 2817) are used to tighten and clamp threaded couplings or quick couplings on hoses.

Corrugated inner surface, clamp collar and tightening from two sides ensure by two ways that the coupling stays in hose: by tightening the hose on the hose shank and by locking the coupling behind the clamp collar.

Clamp material is aluminium or stainless steel AISI 316 / EN 1.4401.

ADVANTAGES

- Safe and durable
- For high hygienic requirements
