

# **Teknikum CHARGE-TEK®**

#### **APPLICATIONS**

Teknikum CHARGE-TEK® charging and blasting hoses are designed together with mining and quarrying professionals to meet the high requirements of safety, functionality and usability in blasting operations.

These hoses are utilized for feeding and dosing explosion emulsion into solid rock drillings. As such, the hose is resistant to all common blasting agents and substances, which are used in mining, civil engineering, excavation and construction industries. These materials may contain e.g. lubricants as well as mineral oil-based products.

As required, the hose is electrically conductive due safety reasons and risks relating to electrical discharges.

#### ADVANTAGES

- Safe and durable hose
- Excellent weather and ageing resistance
- High mechanical strength
- Flexible and easy handling
- Hose can be cut on-site

## **TECHNICAL PROPERTIES**

#### Structure

- Tube:
  - black ETER
  - o smooth
  - o fuel and oil resistant
  - o antistatic
- Reinforcement: synthetic textile, steel spiral acc. to below table
- Cover:
  - black ETER
  - o fuel and oil resistant
  - o antistatic
- Safety factor: 4 (Burst pressure = 4,0 x Working pressure)

#### **Temperature range**

-40°C... +100°C

#### **Electrical properties**

The resistance of the hose is < 10<sup>6</sup>  $\Omega$  per length.

#### MANUFACTURER

Teknikum Oy (Business ID FI07645274), Nokiankatu 1, 38210, Sastamala, Finland
