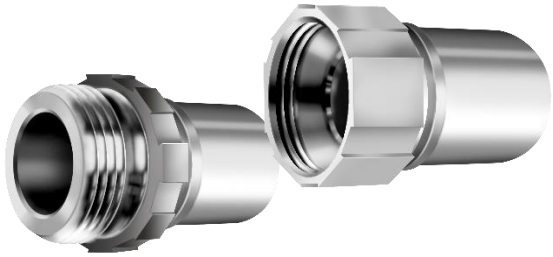
Thread hose coupling



APPLICATIONS

Male and female threaded couplings for several industrial applications, e.g foodstuff, chemical and mining industries.

Coupling thread is according to EN ISO 228-1 / BSP. As default the hose shank is smooth, coupling material is acid proof steel AISI 316 / EN 1.4401. Female coupling seal material is PTFE. Serrated hose shank and other coupling/seal materials available.

Recommended clamps according to EN 14420-3.

ADVANTAGES

- Safe and durable

TECHNICAL PROPERTIES

Material

- Coupling:
  - stainless steel AISI 316 / EN 1.4401
  - other materials available, for example brass

- Seal:
  - PTFE
  - other materials available

SUITABLE HOSE CONNECTORS

- Safety clamp
